

Empowering Future Care Workforces

Research project

UCL

We are investigating how assistive robots can be used to help in health and social care.

We would like to talk to people in online workshops about how assistive robots might help. And about the skills and training that people will need to make best use of robots.

We would really like to talk to a diverse group of:

- **health and social care professionals**
- **family carers**
- **people with lived experience of neurological conditions**

Neurological conditions we are particularly interested in include:

- Stroke
- Muscular dystrophy
- Multiple Sclerosis
- Amyotrophic lateral sclerosis (ALS)
- Cerebral palsy
- Parkinson's disease
- Motor Neuron Disease
- Acquired Brain Injury

We are running **3 sets of online workshops** from **July to November 2022**. Each workshop will last about **90 minutes** and no prior knowledge of technology is needed

Signup now at:

<https://forms.office.com/r/gWAqLRRU4p>

or by scanning this QR code:

We will be scheduling more workshops during August.

If you want to take part have any questions, contact:
